

Make a Beaver Mask!

To make your mask, you will need:

- ♦ crayons or coloured pencils
- ♦ a pair of scissors
- ♦ sellotape or glue
- ♦ some thin elastic

1. Cut out the beaver face and beaver nose. Make sure you don't cut off the tabs!

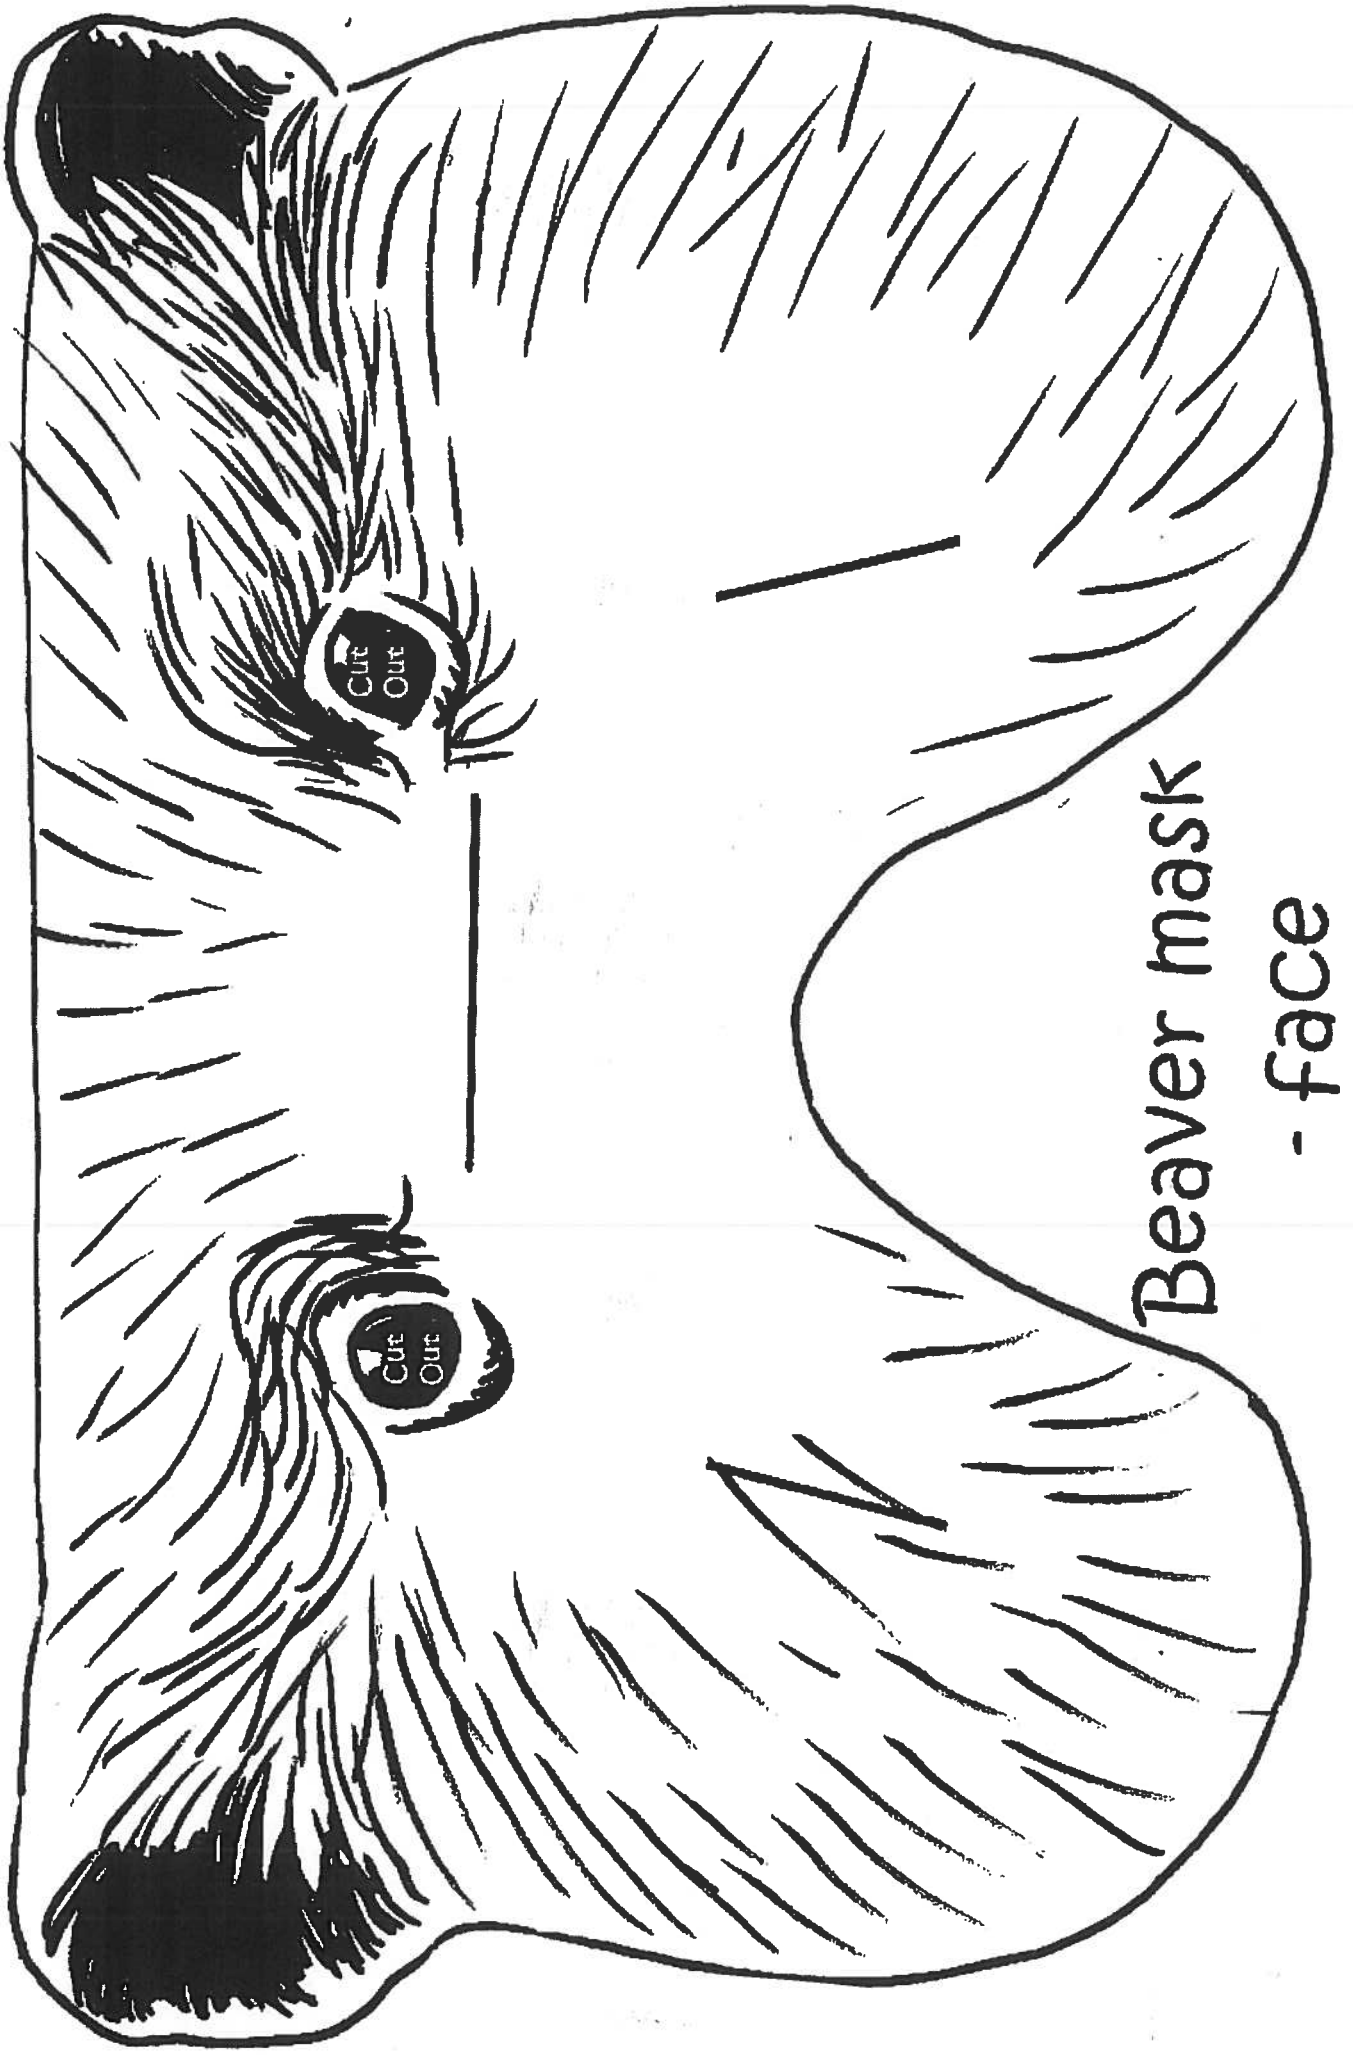

2. Colour in the face and the nose. Ask a grown-up to help you cut out the eye holes.

3. Cut the 3 slits in the face and push the tabs through them. Fasten with sellotape or glue.

4. Measure the correct length of elastic to fit around your head.

5. Make two small holes in either side of the mask. Thread the elastic through and tie a knot.

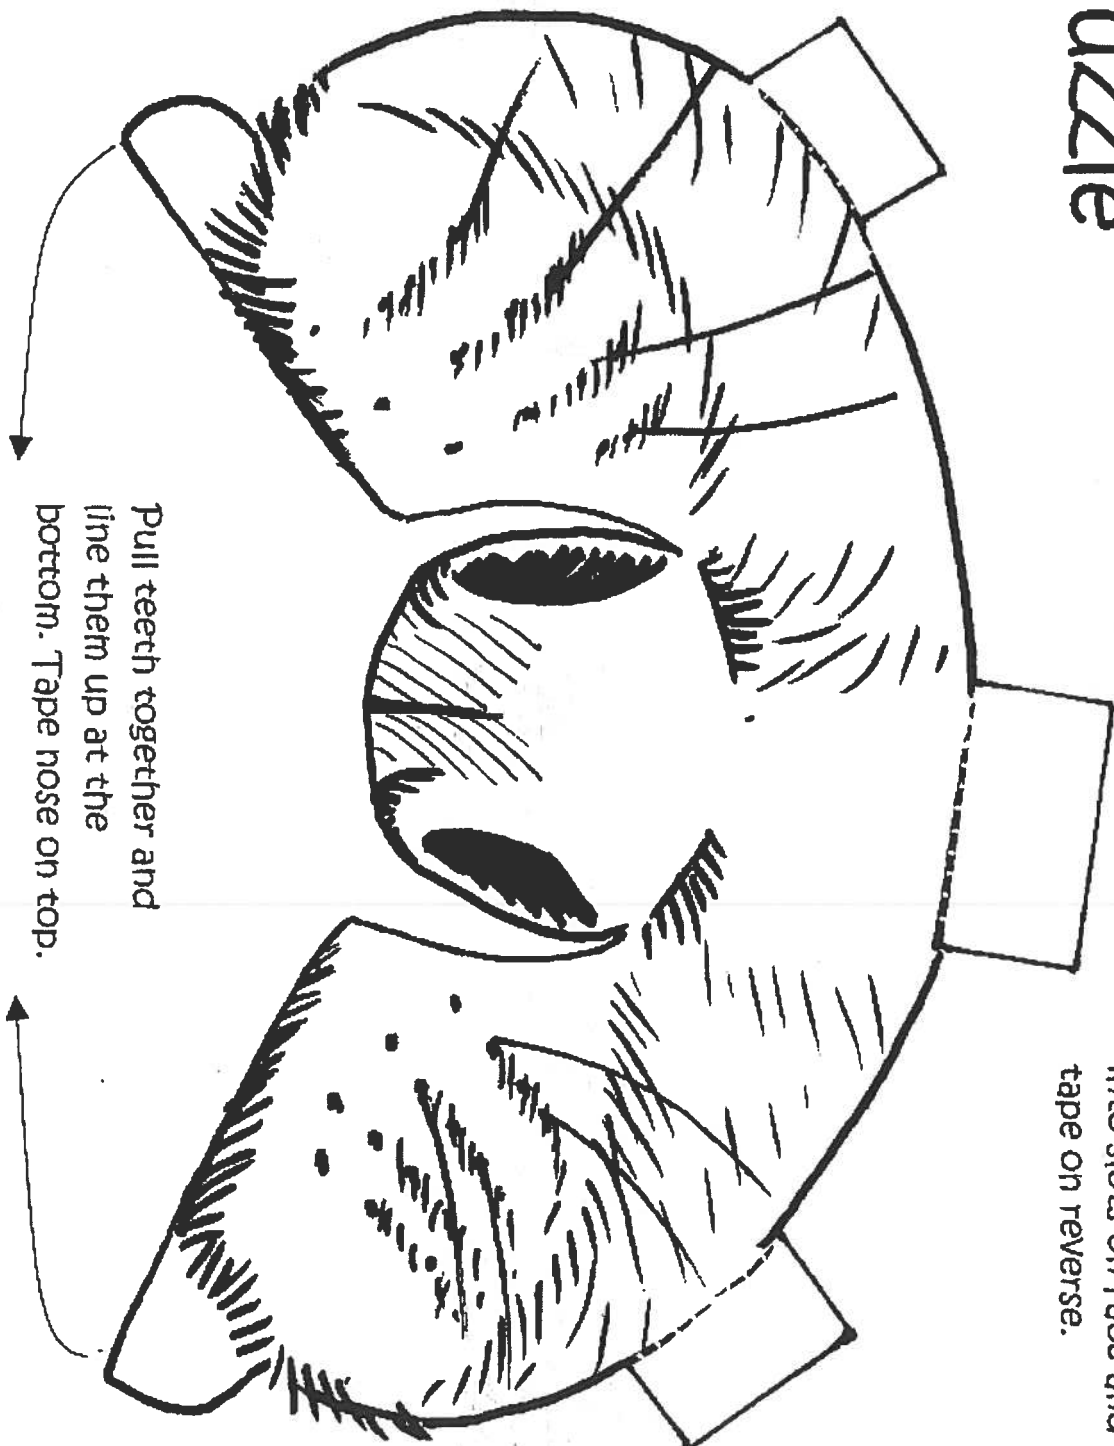

6. Your mask is now ready to wear!

Beaver mask
- face

Beaver mask

- muzzle

Cut round tabs. Insert into slots on face and tape on reverse.

Pull teeth together and line them up at the bottom. Tape nose on top.
